

This hospital is participating in the outpatient module of the

Global Point Prevalence Survey

of Antibiotic Consumption and Resistance

What is it about?

- Data collection on antibiotic **prescription patterns** in the ambulatory care setting
- Identify disease-specific antibiotic prescribing quality **indicators**
- Define **tailor-made interventions** for improved antibiotic prescribing
- Compare data **regionally, nationally and worldwide**

Why?

- Continually improve healthcare quality
- Enhance patient health
- Combat antibiotic resistance
