Containing AMR through Antimicrobial stewardship in Healthcare – G-PPS way

Global PPS Training - Insights into antimicrobial consumption for enhanced antimicrobial stewardship

When Friday 20 November 2026

Where Seminar Hall 1, Amrita Hospital, Faridabad, India
Online participation via this **Teams link**

Objective To equip AMS/clinical physician, pharmacists, nurses with the knowledge and confidence to conduct the Global-PPS, clarify its benefits, and enable them to effectively guide and lead their hospital teams in implementing the survey.

Welcome Lunch		1300-1345hrs	
Welcome - Opening Remarks & Journey with G-PPS	Dr Sanjeev K Singh, Medical Director, Amrita Institute of Medical Sciences, Faridabad	1345-1400hrs	*15 min*
G-PPS in South Asia, a partner in international AMS & policy projects			
An introduction of G-PPS in Antimicrobial usage, with global coverage, objectives for hospitals in South Asia conducting G-PPS	Dr. Sharmila Sengupta, Professor, Dept of Microbiology	1400-1430hrs	30 min
Sharing some selected success stories and future opportunities: G-PPS data for AMS intervention, publications and National guidelines	Indian Hospital Representatives who have been involved with GPPS	1430-1500hrs	30 min
Past, Present and Future of G-PPS - Features of the G-PPS - Training on data collection			
What is the G-PPS - Harmonization trajectory with the WHO-PPS	Ann Versporten (online)	1500-1530hrs	30 min
Procedures of data collection – GPPS modules	Ann Versporten (online)	1530-1600hrs	*30 min*
Tea		1600hrs onwards	

Dear Esteemed Colleague 9 November 2026

It our pleasure to invite you to the Global-Point Prevalence Survey (conducted by University of Antwerp, Belgium) meeting to be held in Amrita Institute of Medical Sciences & Research Center, Faridabad, India on 20th November 2026 between 2.00-4.00pm.

It is our pleasure and honor to invite our friends and colleagues from healthcare institutions from Delhi NCR, and take forward the cause of Antimicrobial Stewardship in containing the burden of antimicrobial resistance.

Participation in the Global Point Prevalence Survey (Global-PPS) on Antimicrobial Use and Stewardship is a valuable opportunity for healthcare institutions, particularly in low- and middle-income countries (LMICs), to become active contributors to the global fight against antimicrobial resistance (AMR). In settings where the burden of infectious diseases is high, resources are limited, and antimicrobial use is often influenced by complex clinical and healthcare challenges. Reliable data are essential to drive meaningful change. By participating, institutions can gain insights into their antimicrobial prescribing practices, identify gaps in antibiotic selection, dosing and duration, recognize opportunities for de-escalation and improved surgical prophylaxis, and benchmark their performance against national and international standards.
More importantly, this will not be merely a data-collection exercise; it is an opportunity to transform evidence into action, strengthen antimicrobial stewardship programs, promote responsible antibiotic use, and safeguard the effectiveness of life-saving antimicrobials for future generations. Every institution/hospital that participates adds a voice, every prescription reviewed creates an opportunity for improvement, and every step towards responsible antimicrobial use brings us closer to a world where effective treatment remains accessible to all.

This program has been active since 2015 and participation has been across the globe. As for healthcare settings like ours in South Asia, where there is dearth of trained manpower, high load of clinical, academic and research work, the G-PPS offers a good platform to establish a robust Antimicrobial Stewardship Program contributing not only to appropriate use of antimicrobials but also creating a benchmark along with other similar institutions towards containing AMR in our region.

Once you confirm your participation, we would send you the registration and program link. We look forward to your participation and look forward to your collaboration in taking forward the cause of “Containing AMR through Antimicrobial stewardship in Healthcare – G-PPS way”

Thank you
Dr Sanjeev Singh & Team
Amrita Hospital
