WAAW2026 LinkedIn

On this first day of World AMR Awareness Week, let's put the spotlight on optimising antimicrobial use, a crucial part of the fight against AMR!

Optimising antimicrobial use starts with knowing how antimicrobials are used. With Global-PPS, you can benchmark prescribing, download feedback reports, identify areas for improvement and measure the impact of your interventions in just a few logical steps. Global-PPS is a free, easy-to-use online tool, built on more than a decade of academic research and experience.

Global-PPS teams up with the EU-funded drive-AMS project to bring behavioural change into the equation: a powerful combination to help put effective antimicrobial stewardship interventions into practice.

See the infographic below and discover how Global-PPS can support your hospital: www.global-pps.com
